

BuggyCart - QA Test Cases Suite (20 Test Cases)

Executed for BuggyCart Sandbox v1.0.0 | Author: QA Intern Portfolio

Test Case ID	Module Name	Test Scenario / Title
TC_REG_01	User Registration	Verify default layout of registration form
TC_REG_02	User Registration	Verify Register button behavior on filling valid details
TC_REG_03	User Registration	Verify Password input field security masking
TC_REG_04	User Registration	Verify Age input with negative value (BVA)
TC_REG_05	User Registration	Verify Age input with zero value (BVA)
TC_REG_06	User Registration	Verify Email input format validation (EP)
TC_CAT_01	Product Catalog	Verify initial product catalog display
TC_CAT_02	Product Catalog	Verify search filter with exact string match
TC_CAT_03	Product Catalog	Verify search filter with non-matching string
TC_CAT_04	Product Catalog	Verify HTML/Script injection in search box (Security)
TC_CAT_05	Product Catalog	Verify 'Price: Low to High' sorting functionality
TC_CAT_06	Product Catalog	Verify 'Price: High to Low' sorting functionality
TC_CAT_07	Product Catalog	Verify 'Reset' button functionality

TC_CRT_01	Shopping Cart	Verify adding single valid item to cart
TC_CRT_02	Shopping Cart	Verify adding item with zero quantity (BVA)
TC_CRT_03	Shopping Cart	Verify adding item with negative quantity (BVA)
TC_CRT_04	Shopping Cart	Verify promo code DISCOUNT10 calculation
TC_CRT_05	Shopping Cart	Verify removing item from cart updates total price
TC_CRT_06	Shopping Cart	Verify Checkout button behavior with empty cart
TC_CRT_07	Shopping Cart	Verify Checkout behavior with items in cart

Pre-Conditions	Test Steps	Test Data
Page is loaded in Chrome browser	1. Navigate to Registration card 2. Inspect all input fields and buttons	N/A
Page is loaded	1. Enter valid email 2. Enter password 3. Enter valid age	Email: john@example.com Pass: Secure123 Age: 25
User is on Registration form	1. Focus into the Password input field 2. Type password characters	Pass: SecretPass123
User is on Registration form	1. Enter valid email 2. Enter password 3. Enter negative age 4. Attempt registration	Email: user@test.com Age: -5
User is on Registration form	1. Enter valid email 2. Enter password 3. Enter age 0 4. Attempt registration	Email: user@test.com Age: 0
User is on Registration form	1. Enter email without domain/extension 2. Enter valid age 3. Attempt registration	Email: invalidemail@ Age: 30
Page is loaded	1. Scroll to Products card 2. Count products and check metadata	N/A
Products are visible	1. Click Search input 2. Type product name	Search: Wireless Mouse
Products are visible	1. Click Search input 2. Type non-existent product	Search: Smartphone
Products are visible	1. Enter HTML/Script tags into Search field	Search: <script>alert(1)</script>
Default catalog loaded	1. Click 'Sort By' dropdown 2. Select 'Price: Low to High'	Selection: Price: Low to High
Default catalog loaded	1. Click 'Sort By' dropdown 2. Select 'Price: High to Low'	Selection: Price: High to Low
Search query active	1. Search for Mouse 2. Click 'Reset' button	N/A

Cart is empty	1. Set quantity to 1 2. Click 'Add' on Wireless Mouse (\$25)	Item: Wireless Mouse Qty: 1
Cart is empty	1. Set quantity to 0 2. Click 'Add' on Wireless Mouse	Item: Wireless Mouse Qty: 0
Cart is empty	1. Set quantity to -2 2. Click 'Add' on Wireless Mouse	Item: Wireless Mouse Qty: -2
HD Monitor (\$150) in cart	1. Enter DISCOUNT10 in Promo field 2. Click 'Apply'	Code: DISCOUNT10
2 items in cart (Total: \$110.00)	1. Click red 'X' link to remove 1 item	Item removed: Mouse (\$25.00)
Cart is empty	1. Click 'Checkout' button	N/A
1 item in cart	1. Click 'Checkout' button	N/A

Expected Result	Actual Result	Status
Email, Password, Age inputs, and Register button display properly with clean UI.	All fields and layout elements display as expected.	PASS
'Register Account' button should become active/enabled once mandatory fields are filled.	Register button remains permanently disabled.	FAIL
Password characters should remain masked using bullets/asterisks (••••••••).	Field changes type to 'text', exposing plain-text credentials upon focus.	FAIL
System displays inline validation error: 'Age must be greater than 0'.	System accepts negative age without throwing any error.	FAIL
System displays inline validation error: 'Age must be greater than 0'.	System accepts age 0 without throwing any error.	FAIL
System displays inline validation error: 'Please enter a valid email address'.	Form attempts submission without validating email structure.	FAIL
All 4 default products display with correct names, prices, and 'Add' buttons.	Catalog renders 4 default items properly.	PASS
Only 'Wireless Mouse' item displays in the product grid.	Grid filters dynamically to display 'Wireless Mouse'.	PASS
Display empty product grid or 'No products found' message.	Product grid becomes empty with no layout break.	PASS
Input field treats tags as plain string without executing script or breaking DOM layout.	Raw string breaks layout rendering and corrupts DOM tree structure.	FAIL
Products reorder in ascending price: \$25.00 -> \$40.00 -> \$85.00 -> \$150.00.	Products reorder in descending price: \$150.00 -> \$85.00 -> \$40.00 -> \$25.00.	FAIL
Products reorder in descending price: \$150.00 -> \$85.00 -> \$40.00 -> \$25.00.	Products reorder in ascending price order instead (\$25.00 -> \$150.00).	FAIL
Search field clears AND product catalog resets to show all 4 original items.	Search input clears, but filtered view remains stuck on screen.	FAIL

Cart updates showing Wireless Mouse (x1) and Total displays \$25.00.	Item added correctly; Total displays \$25.00.	PASS
System blocks addition or displays validation message: 'Quantity must be at least 1'.	Item is added to cart with quantity 0, adding zero to total.	FAIL
System blocks negative numbers and displays inline validation error.	Cart accepts quantity -2, subtracting \$50.00 from total price.	FAIL
Total reduces by 10% (\$15.00 off), updating total to \$135.00.	Total subtracts flat \$100.00, reducing total to \$50.00.	FAIL
Item is removed from list AND total price updates dynamically to \$85.00.	Item disappears from list, but Total Price remains stuck at \$110.00.	FAIL
System displays red error message: 'Cart is empty!'.	Error message displays as expected.	PASS
Displays green success message, clears cart items, AND resets Total to \$0.00.	Success message displays, cart empties, but Total remains at previous value.	FAIL
