

## BuggyCart - Logged Defect Reports (10 Bugs)

Executed for BuggyCart Sandbox v1.0.0 | Author: QA Intern Portfolio

| Bug ID  | Title                                                     | Module            | Severity | Priority |
|---------|-----------------------------------------------------------|-------------------|----------|----------|
| BUG-001 | Registration Submit Button permanently disabled           | User Registration | High     | High     |
| BUG-002 | Password field exposes cleartext on focus                 | User Registration | Critical | High     |
| BUG-003 | Age input accepts negative values without validation      | User Registration | Medium   | Medium   |
| BUG-004 | Unsanitized product search allows DOM layout break        | Product Catalog   | Medium   | Medium   |
| BUG-005 | Inverted price sorting logic in catalog                   | Product Catalog   | High     | High     |
| BUG-006 | Filter Reset button fails to reset product array          | Product Catalog   | Medium   | Low      |
| BUG-007 | Cart allows adding 0 and negative product quantities      | Shopping Cart     | High     | High     |
| BUG-008 | Promo code DISCOUNT10 subtracts flat \$100 instead of 10% | Shopping Cart     | High     | High     |
| BUG-009 | Cart total price fails to update when item is removed     | Shopping Cart     | Medium   | Medium   |
| BUG-010 | Order total persists after successful checkout            | Shopping Cart     | Low      | Medium   |

| Steps to Reproduce                                         | Expected Result                                                        |
|------------------------------------------------------------|------------------------------------------------------------------------|
| 1. Fill Email, Age, Password<br>2. Observe Register button | Register button should become enabled when mandatory fields are filled |
| 1. Click inside Password field                             | Field masks input using type='password'                                |
| 1. Enter age '-5'<br>2. Submit form                        | Validation message preventing negative age                             |
| 1. Type HTML tags like '<script>' in search box            | Special characters escaped properly                                    |
| 1. Select 'Price: Low to High' from dropdown               | Products sorted from lowest to highest price                           |
| 1. Search product<br>2. Click Reset button                 | Input clears and product list resets to default full list              |
| 1. Set quantity to -2<br>2. Click Add to Cart              | Input validation blocks quantities <= 0                                |
| 1. Add \$25 item<br>2. Apply 'DISCOUNT10'                  | 10% discount applied (\$2.50 off)                                      |
| 1. Add 2 items<br>2. Click 'X' to remove 1 item            | Item removed and Total Price recalculated immediately                  |
| 1. Place order successfully<br>2. Observe cart summary     | Cart list empties and Total resets to \$0.00                           |

| Actual Result                                                                | Status |
|------------------------------------------------------------------------------|--------|
| Register button stays disabled due to missing JavaScript event listeners     | Open   |
| Inline event handler changes type to 'text', revealing credentials on screen | Open   |
| Form accepts -5 without error                                                | Open   |
| Raw strings inject into DOM, causing layout rendering issues                 | Open   |
| Products sorted from highest to lowest price due to inverted comparator      | Open   |
| Input clears but UI continues displaying filtered subset                     | Open   |
| Cart accepts negative items and reduces total price                          | Open   |
| Flat \$100 subtracted, producing negative total price                        | Open   |
| Item removed from list, but total price remains unchanged                    | Open   |
| Cart empties, but total dollar amount remains on screen                      | Open   |
